"EASIEST TRACK TO ASSEMBLE"

**TYCO®-lok
ROADRACE TRACK**

With built-in locking feature, patented TYCO-lok Roadrace track just "clicks" together. Permanent alignment and positive electrical contact assured at all times.

Track will not separate under vibrating speeds.

No additional locks, clips or rail connectors needed . . . ever! Ask your dealer about it.

Nearly half a century has passed since the makers of Tyco created the tiny electric motor shown here and brought a new concept of performance and reliability to what was to become the hobby of millions . . . HO scale model railroading. Another great milestone along the Tyco quality trail was the kit for the great 4-4-2 "Atlantic" locomotive shown above. It was just one of a series of Master Kits that brought the enjoyment of HO model railroading within the reach of uncounted numbers who lacked facility for "scratch" building.

Innovation followed innovation . . . all of it based on a dedication to quality that has made TYCO the most trusted brand name in its chosen fields. With the introduction of Roadracing, Tyco applied the same rigid standards of innovation and quality in every detail of performance and appearance. Typically, TYCO-lok (patented) Roadrace Track has been independently judged as easiest track to assemble. Tyco Roadrace Cars are equally regarded as the most beautiful offered anywhere. Make TYCO your choice for HO railroading and HO roadracing. It's so much more fun to own the very best.
